COVER LETTER

Dear Hiring Manager,

I am writing to express my interest in the Senior Full-Stack Developer position at your company. Your commitment to technological innovation aligns with my professional goals and values.

In my current role at Delta Airlines, I led a major development initiative for the Enterprise Payments program, transitioning our payment processing system to a scalable microservices architecture. This project enhanced transaction processing speed by 50% and improved system reliability, meeting your requirement for experience in scalable systems. Additionally, I deployed services on AWS using VPC Endpoints and S3 Buckets, demonstrating my cloud development skills, which are essential for your operations.

A key achievement was migrating from a legacy database to a cloud-native architecture, resulting in a 60% improvement in system performance and a 30% reduction in operational costs. My expertise in Service-Oriented Architecture and RESTful web services optimized our development workflows and increased overall efficiency. I also have extensive experience leading cross-functional teams, which will be valuable in your collaborative environment, particularly for projects requiring innovative solutions.

I look forward to discussing how I can contribute to your team's success. I am eager to bring my expertise to your company and collaborate on future projects that drive technological innovation. Thank you for considering my application, and I look forward to our conversation.

Sincerely,
Padmanaban M
